Naughton Energy was formed in 1976 as a coal trading firm with its initial market efforts concentrated in the Northeastern United States. In the early 1980's the company entered into petroleum sales. During the 1980's coal and petroleum market areas were expanded, and the company initiated sales of natural gas and specialized & industrial lubricants. Naughton Energy is presently supplying coal, petroleum, lubricants, and fuel tanks to customers throughout the continental United States.

The company has a sound credit rating which allows the purchasing of products from a variety of refiners, and provides the ability to securely finance its contract obligations.
